

Dash presents the My Courses list based on step #1. It then makes call #2 separately for each Canvas course to populate the Schedule assignment and quiz data from active classes for that student. Dash then makes calls #3a and 3b to populate the Schedule with CTools data. Calls for CTools and Canvas data can be simultaneous.

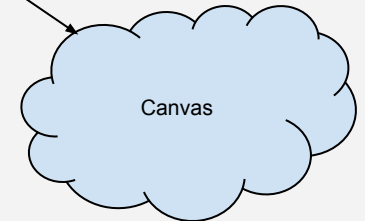

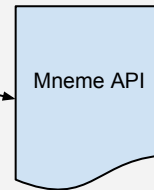

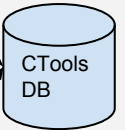

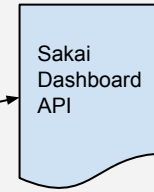

My Courses

1. List of classes a student is registered in within MPathways for a given term.

2. Canvas Assignments & Quizzes for a single student and single class are returned. Classes are those provided by MPathways.

Schedule

3a. CTools assignments

3b. CTools Quizzes
